Reliance Protect Pulse

Small. Lightweight. Discreet.

Delivering lone worker safety at the touch of a button.

Compact, and dust and water resistant, Pulse is styled as a key fob, allowing it to be worn or carried discreetly. Its large alarm button makes it simple and easy to call for assistance when necessary. Excellent battery life and GPS location performance, coupled with non-movement and impact detection, further add to its convenience.

Reliance Protect Supporting Services

- ✓ BS8484 Lone Worker Services enabling escalation to highest Level 1 police responses where appropriate
- ✓ BS5979 Category II 24/7/365 Monitoring Centre
- ✓ ISO 27001 Information Security Management
- ✓ Comprehensive face to face and e-learning training courses for users and managers
- ✓ Detailed management information reporting
- ✓ Online customer portal
- ✓ Stringent service performance levels
- ✓ Proactive customer support through extensive field based staff

Two-way Communication

Prior to going into potentially risky situations, lone workers can use Pulse to leave voice messages detailing their location, the nature of tasks to be performed, and other risk-related details, with the Reliance Protect Monitoring Centre.

Should they subsequently feel at risk and need to raise an alarm, Reliance Protect's experienced, professionally trained lone worker alarm handlers will have immediate access to this information when handling the alarm.

When an alarm is raised, Pulse automatically opens a two-way audio call with the alarm handling operator and sends its latest GPS location, allowing the alarm handler to listen in, monitor the situation, locate the user, and respond and escalate accordingly.

BS 8484 Compliance

In common with Reliance Protect's wider range of BS8484 accredited lone worker solutions, Pulse is fully compliant with BS8484:2016 Code of Practice.

Ease of Use

Pulse's status can be easily checked at any time. LEDs on the side of the unit indicate GSM signal strength and GPS signal status. Pulse also notifies the user when the battery charge is running low, an alarm is raised and voice call has been connected through to the Reliance Protect Monitoring Centre, through simple, discreet vibration patterns.

Exceptional Performance

Pulse has been designed and engineered to deliver exceptional day to day performance. IP66 rated, the device can typically be used without the need for extra protection from the elements. The optional non movement and impact detection provides a further layer of safety and reassurance, generating alarms on behalf of the user when triggered.

Specifications

Dimensions

61 x 44 x 16mm

Weight

35g

Operation Temperature

-20°C to +55°C

Battery

Lithium-polymer

Talk time

Up to 2 hours (configuration dependent)
