IP67 waterproof rugged design

Simple RFID staff assignment and usage audit trail

Reliance Protect VB400 Body Worn Camera

Next generation performance and connectivity

12 hour shift record with pre/post record and live stream options.

- The next generation body-worn camera. The VB400 offers the latest 1080p HD video streaming and recording with Bluetooth connectivity to automatically start recording when used with Bluetooth buttons or holsters, and optional companion smartphone app. GPS positioning technology provides location information for mobile users and connectivity with other VB400 cameras within range offers peer assisted recording, activating colleagues cameras for multiple recordings of the same incident.
- The optional companion smartphone app allows users to view and categorise recorded footage and remotely upload to VideoManager whilst working out in the field.
- Great battery performance delivers upto 12 hours continuous recording with pre/post record options to capture important interactions leading upto and after the incident. Use the camera in incident record mode only and enjoy over 3 months battery life in standby.
- View live streams via the VideoManager portal or have the cameras live stream back into our BS5979 Category II Monitoring Centre for quick and effective incident management by our highly skilled incident management operators.

Service Highlights:

- ✔ BS5979 Category II 24/7/365 Monitoring Centre
- ✔ ISO 27001 Information Security Management
- ✔ Secure online VideoManager portal with powerful yet simple to use features and controls
- ✔ Comprehensive and proactive office and field based support
- ✔ Cloud storage of all media
- ✔ Over 10 years experience monitoring and protecting staff at risk of aggression

Feature	Specification / Description
